

Project Log

Group 02, L01

Bowen Zhang, Jiawei Yu, Kabishan Suvendran, Franklin Tian

Roles and Responsibilities

Kabishan Suvendran

Front-End Developer

Constructed the front-end aspect of the project by self-learning Apache Tomcat, Java Dynamic Web Applications, Servlets and Java Enterprise Edition.

Franklin Tian

Back-End Developer

Developed the back-end implementation of reading dataset class (readCSV), search class, some parts of Main class back-end API.

Jiawei Yu

Back-End Developer

Wrote the implementation of YouTuber class, graph part, depth-first search, and some parts of Main class.

Bowen Zhang

Back-End Developer

Implement the Sort Module, some parts of the Main Module and the TestMain JUnit tests.

Week 8

In this week, there was no change in our project proposal. Besides, every group member was assigned responsibilities. Bowen is responsible for sorting, Jiawei is responsible for graphing, Kabishan is responsible for front-end and Franklin is responsible for searching. We also completed the meeting minutes and the Roles and Responsibilities document.

Week 12

In this week, all the team members focused on developing this project since majority of assignment from other courses are complete. We have finished developing our assigned tasks from last meeting and combined the implementation. Majority of this week's time was spent on debugging variety of problems and discovering new bugs. For example, speeding up searching options and graph construction.
